### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The closest prior art appears to be the Johnson et al patents 5,679,067 and 6,126,533.

These patents disclose a method of gasket removal by means of a rotary molded abrasive brush having a resin body and organic or inorganic abrasive particles, which can be phenolic particles(column 13, line1). The phenolic particles impart a gentle abrasive action to the gasket without harming the underlying substrate. While these references teach the use of phenolic particles, none of the references disclose or teach providing an abrasive article comprising a scrim, a non-woven three dimensional fibrous web having a surface needle tacked to a first major surface of the scrim, and an abrasive layer having a work surface secured to a second surface of the fibrous web, the abrasive particles comprising a resin binder with phenolic abrasive particles of dimension less than 6 micrometers.

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert Rose whose telephone number is (703) 308-1360. The examiner can normally be reached on Monday-Thursday, and on alternate Fridays from 8:00-5:30.
